PAYMENT METHODS:

For example, polio patients given vitamin C suffered no residual defects from their buy alesse (ovral I). online in Australia A controlled study in England on 70 children, half given vitamin C and half given placebo, confirmed that none of the ascorbates treated cases developed any paralysis while up to 20 percent of the untreated group did.

This study was not published because the Salk Vaccine had just been developed and no one was interested in vitamins. Klenners work was ignored. " Dr. Klenner was the first physician to emphasize that small amounts of ascorbates do not work. He said, "If you want results, use adequate ascorbic acid. " As a result of seeing consistent cures of a great variety of viral and bacterial diseases with huge doses of vitamin C, he published over twenty medical reports.

Orthodox medicines rejection of his lifesaving work stands as a reminder to all medical mavericks practicing today. "Some physicians," Klenner wrote, "would stand by and see their patient die rather than use ascorbic acid because, in their finite minds, it exists only as buy alesse (ovral I) online in Australia vitamin. " Dr. William J. McCormick. Over 50 years ago, it was Toronto physician William J. McCormick, M. D.who pioneered the idea that poor collagen formation, due to vitamin C deficiency, was a principal cause of diverse conditions ranging from stretch marks to cardiovascular disease and cancer.

This theory would become the foundation for Linus Pauling and Ewan Camerons decision to employ large doses of vitamin C to fight cancer. Over twenty years before Pauling, McCormick had already reviewed the nutritional causes of heart disease and noted that four out of five coronary cases in hospital show vitamin C deficiency. McCormick also early proposed vitamin C deficiency as the essential cause of, and effective cure for, numerous communicable illnesses, becoming an early advocate of using vitamin C buy alesse (ovral l) online in Australia an antiviral and an antibiotic.

Modern writers often pass by the fact that McCormick actually advocated vitamin C to prevent and cure the formation of some kidney stones as far back as 1946. Linus Pauling, PhD It was two-time Nobel Prize winner Linus Pauling who coined the term "ortho molecular. " Ortho molecular medicine describes the practice of preventing and treating disease by providing the body with optimal amounts of substances which are natural to the body.

Pauling identified sickle-cell anemia as the first molecular disease and subsequently laid the foundation for molecular biology, and then developed a theory that explained the molecular basis of vitamin buy alesse (ovral l) online in Australia Irwin Stone first introduced Pauling to Vitamin C, recommending 3,000mg a day, which was 50 times the RDA.

Pauling and his wife began taking this amount, the severe colds that he had suffered from several buy alesse (ovral l) online in Australia a year all his life no longer occurred. After a few years he increased his intake of vitamin C to 100 times, then 200 times, and then 300 times the RDA now 18,000 mg per day. Pauling lived to be 93. "Professor Pauling, as always, is ahead of his time. The latest research on vitamin C substantiates his twenty-five years of advocacy and investigation on the benefits of vitamin C.

", said J. Daniel Kanofsky, MD, MPH, buy Alesse (ovral l) online in Australia Einstein College of Medicine. 10 Dr. Josef Issels. Because of his well-known professional skills, his kindness, and relatively high rate of survivors, many cancer patients in the terminal stage came to consult German Dr. Josef Issels. In 1951, one wealthy and grateful patient funded his private clinic, where he continued his successful work until 1960, when he was arrested by the German Kriminalpolizei on the instigation of his medical opponents.

He had to close down his clinic for years, in spite of a report from an independent scientist who had concluded that, of 252 terminal cancer patients with histologically proved metastases, 42 had buy alesse (ovral l) online in Australia for at least five years 17 with the Issels therapy. For terminal patients, such a score is disproportionately high.

Issels believed that cancer was the end stage, the ultimate symptom, of a lifetime of immune system damage which had created an environment for the tumor to grow. He argued that conventional therapy just looked at the tumor without recognizing this longtime pre conditioning period. Issels saw the body buy alesse (ovral l) online in Australia having great potential to heal itself. Good nutrition and a clean environment were central to his therapy.
