In a long-term study of the health of the people of in the United States, the U. Public Health Service documented the chances of developing heart disease among various groups in the population. Long before the any symptoms appeared, epidemiological research could identify high-risk groups. Among the highest risk factors buy exelon online in Australia male sex, age over 35, cigarette smoking, high blood pressure, high levels of certain blood fats, and a family history of cardiovascular disorders.

Other researchers have added to this buy exelon online in Australia another risk factor the compulsive, hard-driving, highly anxious personality. The greater the number of buy exelon, online in Australia the greater the persons overall risk. These threats to the heart can be divided into two main categories those beyond individual buy exelon, online in Australia such as age, buy exelon, online in Australia and heredity, and those that can be controlled, avoided, or even eliminated.

Among those in the second category are what cardiologists call "the triple threat." These are the high blood pressure, cigarette smoking, and high cholesterol levels in the blood. If you smoke a pack of cigarettes a day, your risk of buy exelon online in Australia a heart attack is twice that of a nonsmoker. If you smoke, have hypertension, and eat a diet high in fats without any exercise at all, your risk is five times greater than normal. Obviously, buy exelon online in Australia cigarettes and eating a low-fat diet will help.

The next best thing you can do for your buy exelon online in Australia sake is to give it what it needs regular exercise or a complete cardio interval training. The heart is a muscle, or, more accurately, a
