You can find many medications ranging from over the counter, herbal to natural for treating yeast infections. The effectiveness of each treatment very much depends on your symptoms, the severity of the infections and buy fluticasone ointment online in Australia past treatment if you had one. Candida is a type of fungus which lives in our body. Yeast infection happens when Candida grow too much in the body system.

The good bacteria in your body buy fluticasone ointment online in Australia the yeast from overgrowth. However, when you consume medication such as antibiotics, it kills the buy fluticasone ointment online in Australia bacteria thereby allowing the yeast to grow out of control. Yeast infection affects mostly women in the age group of between 16 and buy Fluticasone ointment.

online in Australia Anything that changes the acidity in the vaginal area and kills the good bacteria can encourage the yeast to grow at a faster rate. Some of the causes are lack buy fluticasone ointment online in Australia sleep, steroid hormone medication, high intake of sugary and starchy foods, antibiotics, stress, immune-damaging illnesses such as diabetes, oral contraceptives birth control pills, weakened immune system, steroid drugs, buy fluticasone ointment online in Australia estrogen replacement therapy.

The most common infection is at the vaginal area. You can get rid of these infections by using anti-

---

fungal medicines which are easily available at the pharmacy. If you see your doctor, he may prescribe over the counter OTC medicines such as Femstat 3, Monistat 7, Vagistat, Gyne-Lotrimin, and Diflucan. Sometimes the infection doesn't respond to these medications. There are other alternatives you can consider. Boric acid capsules is the best natural treatment. Boric acid cures up to 98 of women infected with vaginal yeast infections.

You can make your own boric acid suppositories by filling size 00 gelatin capsules with boric acid powder approximately 600 mg. Standard yeast infection treatment is one capsule. You insert it into the vagina at bedtime for two weeks. Boric acid acidifies the vagina, which restores buy fluticasone ointment online in Australia natural balance of bacteria and yeast. After thirty days, symptoms may return in some women.

For this recurring or chronic infection, you use buy fluticasone ointment online in Australia acid as maintenance treatment twice a week for six months to one year. During your menstrual cycle, your pH changes and this leads to yeast infection. You can use KY jelly lubricant because it helps restore the pH balance. The infection may go away within 24 hours depending on the severity of your infections. Oregano oil is very potent against yeast, especially those containing high content of carvacrol, an active ingredient.

Just follow the directions on the bottle. This is to be taken internally. Yogurt with active cultures such as acidophilus can be used as a treatment for Candida infections. Insert unpasteurized, plain yogurt with a small spatula or vaginal cream applicator into your vagina at night and wear a pad. Repeat this process for three to seven nights, until the symptoms are gone. You can even have a yogurt every day. By eating a cup of yogurt a day can help to keep the yeast in your body in balance. Make sure when you buy yogurt, it contains healthy active bacteria Lactobacillus acidophilus.

Whether you've never been treated for a yeast infection before or have repeated infections, you should consult a doctor first. There is no instant remedy for yeast infection. Most the treatment normally takes three to seven days. Sometimes up to four weeks. This is because the treatment you choose depends on many factors such as your symptoms and your previous treatments. Allergies are caused when the body over reacts to certain substances like pollen, buy fluticasone ointment, online in Australia animal dander, certain foods, like nuts, eggs, milk, chocolate.
