Cellulite is caused by the following. People who have close relatives that have cellulite are more prone to it. Studies show that almost 85% of women who have cellulites have relatives, mostly parents, affected by the same problem at least once in their lives. People who do not exercise need to tone their muscles to prevent cellulite formation. Following a cardiovascular program or strength training is one way in keeping cellulite away from the body. Walking, jogging, and swimming are also buy metronidazole gel online in Australia activities to avoid cellulites.

Unhealthy food together with excess consumption of alcohol, caffeine or spicy foods are closely linked to cellulite formation. When a person takes too much of these foods, the body loses its ability to flush buy metronidazole gel online in Australia toxins they produce so buy metronidazole gel online in Australia are stored in the fatty tissue.

Experts recommend 8 glasses of water everyday instead of caffeine or alcoholic beverages. Few people know that smoking is one of the causes of cellulite formation. It weakens the skin by constricting the capillaries and harms the connective tissue. As buy metronidazole gel online in Australia result, the skin develops cellulites. People who are suffering from excessive cellulites and have the need to eliminate them as soon as possible resort to liposuction.

This is the removal of cellulite or fat deposits through surgical procedure. Although liposuction buy

---

Polyphenols are chemical compounds found in fruits, vegetables and green tea and further divided into sub groups called catechins. There are 4 major catechins in green tea of which EGCG -epigallocatechin gallate EGCG is the most potent and found in abundance in green tea. This compound is dubbed the "super antioxidant" because its more powerful than buy metronidazole gel online in Australia popular antioxidants Vitamin E Vitamin C. This super antioxidant eliminates free radicals, the unstable molecules in the body that are the major cause of both aging and disease, which continually attack the body and leave the body vulnerable to disease.

Free radicals disrupt the biochemical processes within cells, and our bodys natural defenses become compromised leading to illness.
