Eye shadow is designed to attract attention to a persons eyes yes, male movie stars use it too, and at

the same time buy phenergan online in Australia the appearance of the eyes by detracting attention from or covering up minor flaws. Here are some tips on how to apply eye shadow in order that it fixes some of the flaws you may believe are there. To maximize the effect of your eye shadow, you will want to make sure that people are aware buy phenergan online in Australia you have it on.

Some beauty experts suggest priming your eyes before applying the shadow. The eye lids are a lighter shade than the skin on the rest of the face, due mainly to their lessened exposure to light over the course of a lifetime. A layer of bone shadow over your lids will even up the coloring with the rest of the face, and any color you apply on top of that will tend to stand out. Next, experiment with several shades before you decide on the right one for you.

A bronze colored eye shadow works for most eyes, and other shades will depend on the color of your own eyes. Blue eyes, for example, will be best complemented with a deeper shade of blue this will make your own eye color pop out and look extra blue, taupe, violet, or gray. Lighter shades and contrasts work great for brown eyes, buy phenergan online in Australia green eyes are bedazzling with the similar shades that are slightly buy phenergan.
