The Herpes Simplex virus or HSV is a difficult disease. It is widely known as incurable, with painful skin lesions on sensitive areas of the body. The lesions recur more often for some people than others buy Synthroid online in Australia their outbreaks tend to be buy synthroid online in Australia to periods of high-stress. Modern medicine does not offer a cure, though there are pharmaceutical preparations available to limit the frequency and duration of HSV outbreaks. With a reputation as incurable, painful, not-so-pretty, and varieties described as oral and labial or genital, the disease can be a little challenging and embarrassing buy synthroid online in Australia say the least.

Well, I've been through this. I've had the painful lesions, had to deal with the regular outbreaks of painful cold-sores in my buy synthroid online in Australia and on my lips I was blessed with the oral variety. I've been through those great internal debates on how to break the news to buy synthroid online in Australia partner thankfully always returning that look that says something like Oh.

I thought you were going to tell buy synthroid online in Australia my cat buy synthroid online in Australia died, thats no big deal. Though it still seemed like a big deal. Regularly having those few days of feeling like a flu was coming on, followed by a few days of outbreak - at what always seemed like the worst of times.

On top of it, being an athlete, buy synthroid online in Australia really hard tended to cause outbreaks as well - weightlifting in particular. Maybe it was just really strenuous, or maybe I wasn't actually a weightlifter - but that heavy lifting would almost always lead, once again, to an outbreak. I frequently

wondered buy synthroid online in Australia the midst of these bouts with HSV if this was buy synthroid online in Australia I'd have to deal with for the rest of my life - I tried doctor prescribed medicines, Lysine and other remedies, but none kept the virus at bay enough to really make a difference.

Then someone introduced me to essential oils, and I learned a little about their studied antiviral activity. I stumbled onto research performed with a certain oil known as Melissa. Melissa essential oil is distilled from Melissa herb, a plant with a long history in natural medicine. The plant yields a relatively small amount of oil compared to other aromatic varieties, so its cost seems a little high.

buy Synthroid online in Australia formal investigation has been being going on in Europe for many years applying the oil buy synthroid online in Australia herpes lesions, with very promising results. One company has even extracted a component of the oil and sold it in a prescription form though buy Synthroid online in Australia have not read of any evidence showing the extract works better than the oil itself.

The most encouraging statement regarding the use of Melissa on herpes was made by Dr. Dietrich Wabner, buy synthroid online in Australia professor at the University of Munich he stated that a single application of Melissa may lead to a complete remission of the disease. A possible cure. I'd figured I had nothing to lose, so I tried a little bottle of the buy synthroid.

online in Australia Searching further, I found a regimine for the oils use. Melissa might buy synthroid online in Australia lead to a complete remission in just one application - other healers were finding success when the oil was applied buy synthroid online in Australia the affected area when an outbreak felt imminent. The oil was applied perhaps three times per day during the outbreak; this was buy synthroid online in Australia the next several buy synthroid online in Australia the user thought an outbreak may be coming on, and through the duration of the skin healing.

My outbreaks were usually on my tongue at that point though they started on the palate of my mouth. I would get a very fatigued feeling for a few days, then my tongue would get what seemed like individual taste buds that would feel as though they were burnt and yes, I have had medical confirmation as to their cause.
