The potential health risks posed by some birth control products that underwent very short, inconclusive field testing makes further research a great necessity. According to a Belgium-based research, they said that the long-term use of birth control pills can increase buildup of debris or plaque in the arteries, making the buy triamcinolone oral paste online in Australia of the drug more exposed to risk of heart disease.

Another study claims that 1,300 healthy women aged 35 to 55 had 20 percent to 30 percent increase in prevalence of arterial plaque for every ten years of oral contraceptive use. While the said arterial plaque identified were buy triamcinolone oral paste online in Australia and not large enough to block an artery, any plaque is thought to raise your risk of heart disease.

Many of the women in the study had used older, first-generation birth control pills, which had twice the estrogen levels as most oral contraceptives used today. Such side effects of birth control may seem ordinary to the naked eye and hardly noticeable during the early years of use, so women should be aware of their current health condition.

Moreover, the use of birth control pills for non-contraceptive purposes is rarely justified. If in case a woman only uses birth control pills for controlling menstrual cycles, irregular bleeding, cysts, or endometriosis, then they are not treating their underlying condition. Instead, they may simply be
