Make sure to bring detailed copies of your medical records, since the doctor will need to complete a medical history. The doctor will perform a close examination of your buy zocor online in Australia and eyelids, including a vision exam, as well as discuss your goals for the surgery. Your surgeon will also use the initial consultation to go over the details of the procedure, the expected results, the risks, and the costs involved. If you are considering eyelid surgery, it is important to thoroughly research the procedure, even if this just means talking buy zocor online in Australia the details with your surgeon.

Blepharoplasty is a relatively safe procedure, although like all other surgeries, you do run the risk of complications. When performed by a qualified surgeon, complications resulting from blepharoplasty are infrequent and typically minor. Minor complications may include temporary swelling of the eyelids, excess tearing, temporary blurred or double vision, tissue tenderness, sensitivity to light, and scarring at the site buy zocor online in Australia the incision.

More serious complications include infections and a reaction to the anesthesia used in the procedure. Occasionally patients find that they have difficulty buy zocor online in Australia their eyes after blepharoplasty. Most often this is a temporary side effect, although there have been reports of the condition becoming permanent. In rare cases, patients may experience a pulling down of their lower eyelids, called ectropion, which requires additional surgical procedures.

Most eyelid surgeries are performed under buy zocor online in Australia local anesthesia which is used to numb the tissue and muscles around your eyes. Your surgeon may also give you buy zocor

---

online in Australia sedative, either orally or intravenously, to help relax you since patients are kept awake during the procedure. Under local anesthesia, you will not feel any pain but may experience some tugging or pressure during buy zocor online in Australia surgery.

In certain circumstances, some surgeons opt to perform blepharoplasty under a general anesthetic, in which case the patient is asleep throughout the entire procedure. The surgeries typically last from 90 minutes to 3 hours, depending on how buy zocor online in Australia eyelids are to be corrected. During the procedure, the surgeon makes small incisions along the natural lines buy zocor online in Australia the eyelids just under the eyelashes on the lower lids and in the deep creases of your upper eyelids.

Excess fat is removed through the incision, and sagging muscle and skin are trimmed to neaten your appearance. Once the trimming is completed, your surgeon will use tiny sutures to stitch up the incision. Once the surgery is complete, your surgeon will advise you on buy zocor online in Australia to care for the incision. You will likely to be told to keep your eyes lubricated with an antibiotic ointment and take pain buy zocor online in Australia to control any discomfort you feel during the healing process.

Cold compresses can be used to minimize swelling and bruising buy zocor online in Australia patients will find that even with the compresses the swelling, tenderness, and bruising will be present for several days and may even last up to a month. Your eyes may tingle and feel gummy or dry for several days as well. Expect to return for a follow-up visit to your surgeon a few days after the procedure for a checkup buy zocor online in Australia removal of your stitches. Remember that buy zocor online in Australia healing process takes time and it may be several weeks before you are completely recovered.

In time the incisions will become less and less noticeable, fading into a thin white line that will be barely noticeable. The end buy zocor online in Australia of the surgery though, should buy zocor online in Australia brighter more alert eyes that make you look well-rested buy zocor online in Australia youthful. Toremifene Citrate, an oral selective estrogen receptor modulator buy Zocor online in Australia that helps to fight the actions buy zocor online in Australia estrogen in the body, is formally called Fareston-Toremifene Citrate.
