This procedure has been performed for over 20 years and is considered safe. The "flap" is a large portion of hair-bearing skin which is transferred from the sides or back of the head to the buy zyrtec online in Australia area. The flap is then sewn into place buy zyrtec online in Australia still attached to its original blood supply, ensuring that the hair will grow continuously and will hide any scars resulting from the procedure. Plastic surgeons have developed a number of successful flap techniques which, combined with scalp reduction, result in better coverage of the crown.

They also apply tissue expansion to provide better frontal coverage for a natural hairline. Scalp reduction This technique involves the removal of the skin from a balding area on the back of the head and then suturing the area, pulling the skin together. Although this may seem like a simple process, the surgery requires a buy zyrtec online in Australia with specific training and experience in scalp reduction. This procedure buy zyrtec online in Australia local anesthesia, injected into the scalp, before the segment of bald scalp is removed.

The size and shape of the segment to be removed varies depending on the buy zyrtec online in Australia. In most cases, the surgeon removes a segment of the scalp in an inverted Y-shape; buy zyrtec online in Australia will also sometimes excise pieces of scalp buy zyrtec online in Australia the shaped of a U or a pointed oval, depending on the coverage that the individual requires. Scalp Expansion This procedure is very similar to scalp extension.

Both procedures are done buy zyrtec online in Australia scalp reductions, especially in cases of a

tight scalp. Scalp expansion is also used to prepare individuals for flap surgeries. Tissue Expansion
This procedure is commonly used by plastic surgeons in reconstructive surgeries, to repair wounds
that are caused by burning or injuries that have resulted in significant skin loss. The same procedure,
when applied to hair replacement surgery, has resulted in impressive results where significant
coverage is desired in a much shorter amount of time.
